**Attachments:** Corrosive\_Extractions\_v2\_updated\_5.19.2021.xlsx

Hi Greg – RAB 8 does have a list of actives that they screened for the EDSP project, see the attached spreadsheet (and e-mail below).

Thanks,

Rick

Hey Rick,

Attached is the work we did on the corrosive list for EDSP. The "README" tab explains the process we used to find the documents and all the fields included in the spreadsheet. The "Corrosive List" tab contains everything that we found listed as Cat 1 for acute eye or dermal tox. The "Detailed Extractions" tab has everything that we reviewed with **one row per RA document**. So please bear in mind that multiple chemicals are included in some RA documents and were not deduplicated. If you have any questions, please let me know.

Thanks!  
Brandall
